# Godot AdMob Plugin

release v5.1.0 | Godot 4.5.0+ | stars 639 | Discord | License MIT

Downloads 146K | Download Asset Store

Android | iOS | GDScript | C#

**The complete solution for Google AdMob integration in Godot using GDScript or C#.**

🎬 Watch Video Tutorial • 📖 Read Documentation

📦 Installation • 🎨 Ad Formats • 📋 Examples • 🙏 Support

## ✨ Key Features

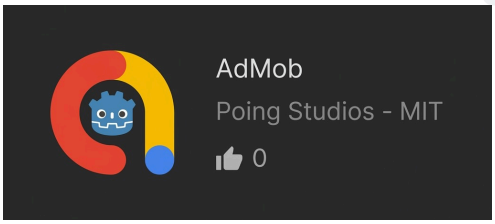

- **Google SDK Experience**: Designed to mirror the official Google Mobile Ads SDK structure, APIs, and documentation.
- **Godot 4.5.0+**: Native support for Android and iOS with full 1:1 GDScript and C# parity.
- **All Formats & Mediations**: Out-of-the-box support for all Google ad formats and mediation adapters.
- **Editor Mock Ads**: Test and preview ad layouts directly inside the Godot Editor.
- **AI-Agent Ready**: Optimized to work with AI coding assistants for automated configuration.

---

## 📦 Installation

### 📥 Godot Asset Store (Recommended)

1. Open your Godot project.
2. Go to the **AssetLib** tab and search for `AdMob` by `Poing Studios`.

3. Click **Download** and **Install**.

▶ **Manual Installation (Custom Releases)**

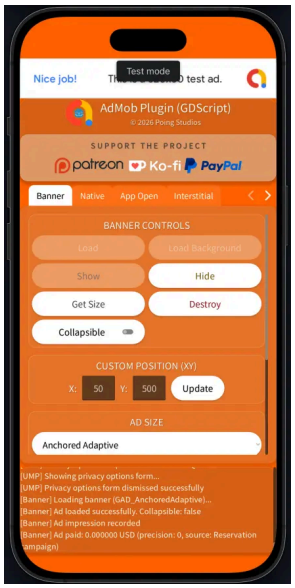

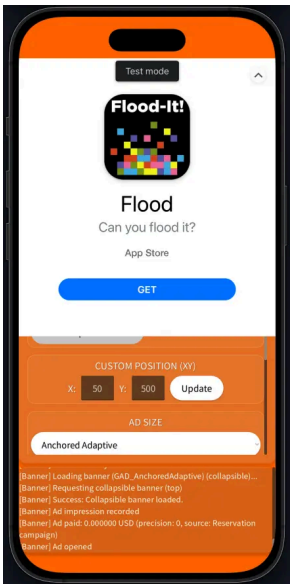

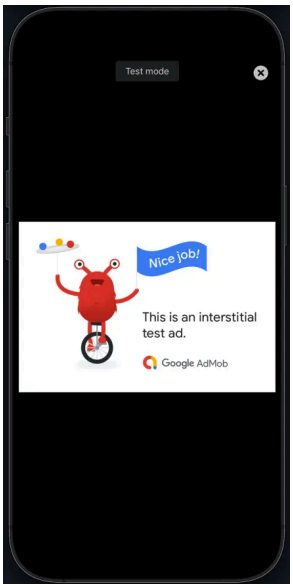

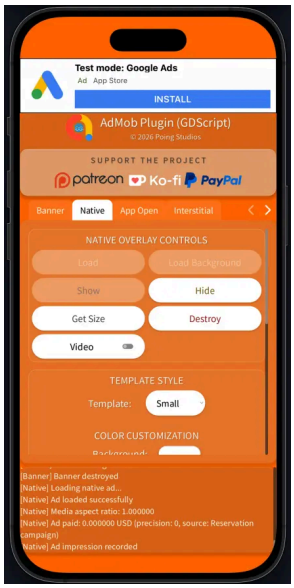

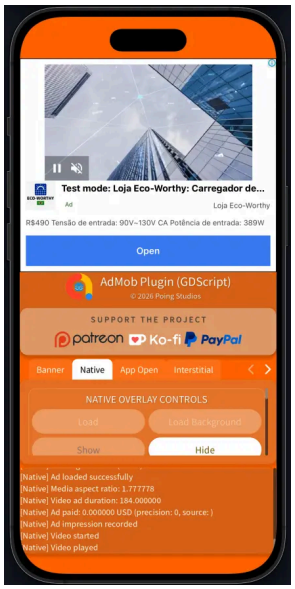

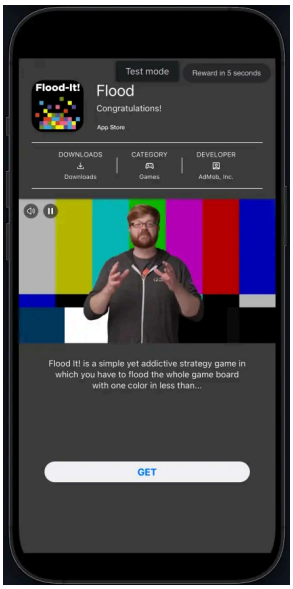

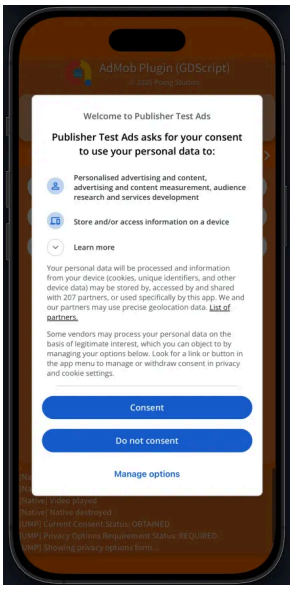

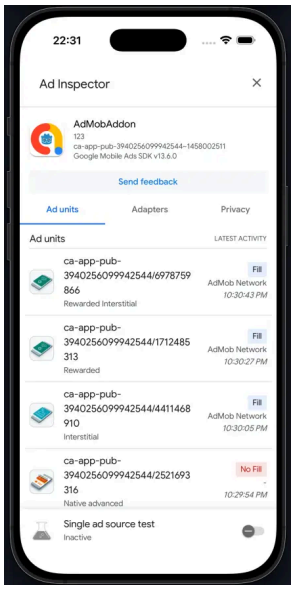

### ⚙️ Post-Installation Setup

1. Enable the plugin in `Project → Project Settings → Plugins`.
2. Configure the required native dependencies for your target platforms:
   - **Android Setup**: Follow the Android Platform Guide.
   - **iOS Setup**: Follow the iOS Platform Guide.

> **Tip**
>
> If automated package downloads fail, or when updating your Godot Engine version, trigger them manually in the editor via `Project → Tools → AdMob Manager → (Android/iOS) → Download & Install`.

---

## Showcase

| Banner | Collapsible Banner | Interstitial | Native |
| --- | --- | --- | --- |
|  |  |  |  |
| **Native Video** | **Rewarded** | **UMP Consent** | **Ad Inspector** |
|  |  |  |  |

## How to Use

After installation, the `MobileAds` singleton becomes globally available in any script.

## Examples

### Initialize AdMob

Must be called once during game startup before requesting any ads.

▶ GDScript

▶ C#

### 📱 App Open Ads

Designed to be shown when users cold-start or return to your game.

▶ GDScript

▶ C#

### 🎏 Banner Ads

Rectangular ads occupying a portion of the screen layout (supports standard and collapsible formats).

▶ GDScript

▶ C#

### 📺 Interstitial Ads

Full-screen ads covering the interface until dismissed by the user.

▶ GDScript

▶ C#

### 🖼️ Native Overlay Ads

Highly customizable native layout format supporting small templates and native video playback.

▶ GDScript

▶ C#

### 🎁 Rewarded Ads

Allows you to give users in-game rewards for watching videos or interacting with ads.

▶ GDScript

▶ C#

### 🎁 📺 Rewarded Interstitial Ads

Shows rewarded ads automatically during game transitions without requiring the user to opt-in.

▶ GDScript

▶ C#

## 🔒 Privacy & Debugging Tools

### 🌐 User Messaging Platform (UMP)

Request user consent for personalized ads under regulations like GDPR, COPPA, and CCPA.

▶ GDScript

▶ C#

### 🔍 Ad Inspector

Google's diagnostic overlay to verify ad unit configurations, adapter statuses, and real-time ad delivery.

▶ GDScript

▶ C#

---
